

I-75 at State Road 82
Fort Myers, Florida

Project Title: Design-Build of I-75 at State Road
82 Ramps
Project Number: E1E32
Customer: Florida Department of
Transportation
Dollar Amount: \$1,447,312.00
Percent Complete: 100%
Completion: April 12, 2006
Role: Prime Contractor

Project Scope:

This project involved a design-build procurement process to improve traffic flow and stacking cues for the off ramps from I-75 onto SR82. QE and its design partner were responsible for all permitting and construction of this project. The project included the widening of the ramps, placement of embankment, lime rock placement, asphalt placement, milling and repaving of existing lanes, creation of stormwater detention ponds and new signalization. All work was self-performed by QE except for signalization.
