

Reconstruction of South and North Collier Boulevard Marco Island, Florida

Project Title: Reconstruction of South and North Collier Blvd.
Project Number: 05-052
Customer: City of Marco Island, Florida
Dollar Amount: \$25,902,595.77
Percent Complete: 100%
Completion: May 31, 2008 (Early Completion)
Role: Prime Contractor

Project Scope:

This project involved the completed reconstruction of approximately 4 miles of roadway on Marco Island including new utilities, roadway construction, sidewalks and curbs. A portion of this project involved the scarification of existing bridge decks on the Flat Bridge and Smokehouse Bridge, deck repair of existing pre-cast deck panels and resurfacing of decks. Also included was joint repair and replacement. All work was self-performed by QE. The project required heavy coordination with seasonal traffic, local business and emergency services, as well as the many hotels along the Boulevard. QE received a \$200,000.00 early completion bonus for Phase I of South Collier Blvd. The project was divided into three segments and was completed on time in 30 months. QE performed an average of \$863,000.00 of work per month.
